## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over

Haartsen US patent No. 5,960,048 in view of Chen et al US patent No. 6,424,673.

Haartsen discloses a receiver fig. 1 for receiving a sequence of sequence values 201, a memory in said receiver for storing a plurality of known sequences values see col. 5, lines 56-58; a processing unit 300 connected to said receiver and said memory included in the receiver configured to compute a plurality of correlation results see col. 5, lines 63-67 between said sequence of values and said plurality of known sequences of values. However, Haartsen does not teach that the processing unit is configured to compute said plurality of correlation results using a modified correlation equation. Such limitation however, does not involve any inventive step. For instance, Chen teaches at col. 7, lines 37-40, simplifying (modifying) cross correlation equation to calculate cross correlation values. It would have been obvious to one skill in the art at the time of the invention to incorporate the teaching of Chen in Haartsen in order to reduce processing

complexity and memory location requirements as taught by Chen see col. 7, lines 39-65.

***Allowable Subject Matter***

3. Claims 1-29 are allowed. Note that the claims must be amended, if necessary, to overcome any objection sets forth above.

4. Claims 31-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claim 30 have been considered but are moot in view of the new ground(s) of rejection.

6. **Any response to this action should be mailed to:**
